The Expedition is a full-sized SUV built by Ford Motor Company. It was introduced in 1997 to replace the Ford Bronco. Unfortunately, the Expedition is not without its problems. When you do need to troubleshoot the Expedition, fortunately, you do not need to be a rocket scientist. When you discover a problem, you will want to figure out first what is causing it.

5.4 Triton Engine Failure of the Fuel Pump Driver Module. This problem is typical for the Ford F-150 with a 5.4 Triton engine. Failure of the fuel pump driver module usually cuts off the petrol feed to the engine which, of course, causes the engine to turn off, thus cutting power to all essential systems.
