The definitive story of the making of 2001: A Space Odyssey, acclaimed today as one of the greatest films ever made, and of director Stanley Kubrick and writer Arthur C. Clarke— “ a tremendous explication of a tremendous film....Breathtaking ” (The Washington Post). Fifty years ago a strikingly original film had its premiere. Still acclaimed as one of the most remarkable and important motion pictures ever made, 2001: A Space Odyssey depicted the first contacts between humanity and extraterrestrial intelligence. The movie was the product of a singular collaboration between Stanley Kubrick and science fiction visionary Arthur C. Clarke. Fresh off the success of his cold war satire Dr. Strangelove, Kubrick wanted to make

the first truly first-rate science fiction film. Drawing from Clarke ' s ideas and with one of the author ' s short stories as the initial inspiration, their bold vision benefited from pioneering special effects that still look extraordinary today, even in an age of computer-generated images. In Space Odyssey, author, artist, and award-winning filmmaker Michael Benson “ delivers expert inside stuff ” (San Francisco Chronicle) from his extensive research of Kubrick ' s and Clarke ' s archives. He has had the cooperation of Kubrick ' s widow, Christiane, and interviewed most of the key people still alive who worked on the film. Drawing also from other previously unpublished interviews, Space Odyssey provides a 360-degree view of the film from its genesis to its legacy, including many previously untold stories. And it features dozens of photos from the making of the film, most never previously published. “ At last! The dense, intense, detailed, and authoritative saga of the making of the greatest motion picture I ' ve ever seen...Michael Benson has done the Cosmos a great service ” (Academy Award-winning actor Tom Hanks).

Six decades of fascinating stories from the legendary “ colossus of science fiction ” and creator of 2001: A Space Odyssey gathered in one compendium (The New Yorker). Arthur C. Clarke, along with H. G. Wells, Isaac Asimov, and Robert A. Heinlein, was a definitive voice in twentieth century science fiction. A prophetic thinker, undersea explorer, and “ one of the true geniuses of our time, ” Clarke not only won the highest science fiction honors, the Nebula and Hugo Awards, but also received nominations for an Academy Award and the Nobel Peace Prize, and was knighted for his services to literature (Ray Bradbury). Now, more than one hundred works of the sci-fi master ' s short fiction are available in the “ single-

The mysteries of the monoliths are revealed in this inspired conclusion to the Hugo Award-winning Space Odyssey series— “ there are marvels aplenty ” (The New York Times). On an ill-fated mission to Jupiter in 2001, the mutinous supercomputer HAL sent crewmembers David Bowman and Frank Poole into the frozen void of space. Bowman ’ s strange transformation into a Star Child is traced through the novels 2010 and 2061. But now, a thousand years after his death, Frank Poole is brought back to life—and thrust into a world far more technically advanced than the one he left behind. Poole discovers a world of human minds interfacing directly with computers, genetically engineered dinosaur servants, and massive space elevators built around the equator. He also discovers an impending threat to humanity lurking within the enigmatic monoliths. To fight it, Poole must join forces with Bowman and HAL, now fused into one corporeal consciousness—and the only being with the power to thwart the monoliths ’ mysterious creators. “ 3001 is not just a page-turner, plugged in to the great icons of HAL and the monoliths, but a book of wisdom too, pithy and provocative. ” —New Scientist
