The AREAER provides a description of the foreign exchange arrangements, exchange and trade systems, and capital controls of all IMF Member countries.

Published since 1950, this authoritative annual reference is based on a unique IMF database that tracks exchange and trade arrangements for 187 IMF member countries, along with Hong Kong SAR, Aruba, and Curaçao and Sint Maarten. The Annual Report on Exchange Arrangements and Exchange Restrictions (AREAER) draws together information available to the IMF from a number of sources, including during official IMF staff visits to member countries. There is a separate chapter for each of the 189 countries included, and these are presented in a clear, easy-to-read tabular format. A summary table allows for simple cross-country comparisons of key features of their exchange and trade regimes. The report's introduction summarizes recent global trends and developments. It discusses such topical issues as exchange rate arrangements, current or capital transactions, or prudential regulations. The individual country chapters outline exchange measures in place, the structure and setting of exchange rates, arrangements for payments and receipts, procedures for resident and nonresident accounts, mechanisms for import and export payments and receipts, controls on capital transactions, and provisions specific to the financial sector. The report now provides more detailed information on the operations of foreign exchange markets and exchange rate mechanisms and better describes the regulatory framework for current and capital account transactions.

This book, first published in 1989, is a valuable addition to the literature on the study of American business history. Most previous historians, however, have studied the management of business in a vacuum, separating the internal affairs of particular companies from the social and political environments in which corporations existed. From 1799 to 1842 the Manhattan Company had three distinct divisions: a water works, a main bank in New York City, and bank branches in upstate New York. To successfully manage this complicated and decentralised business, the Manhattan Company's directors had to be particularly sensitive the social and political environments. This book traces the history of banking in New York, an examination of the nature and significance of the Company's charter, and a detailed analysis of the Company's three divisions.
