"Tension between unity and diversity plagues any attempt to recount the development of earliest Christianity. Explanations run the gamut -- from asserting the presence of a fully formed and accepted unity at the beginning of Christianity to the hypothesis that understands orthodox unity as a later imposition upon Christianity by Rome. In *Christian Theology and Its Institutions in the Early Roman Empire*, Christoph Marksches seeks to unravel the complex problem of unity and diversity by carefully examining the institutional settings for the development of Christian theology. Specifically, Marksches contends that theological diversity is closely bound up with institutional diversity. Marksches clears the ground by tracing how previous studies fail to appreciate the critical role that diverse Christian institutions played in creating and establishing the very theological ideas that later came to define them. He next examines three distinct forms of institutional life --the Christian institutions of (higher) learning, prophecy, and worship -- and their respective contributions to Christianity's development. Marksches then focuses his attention on the development of the New Testament canon, demonstrating how different institutions developed their own respective "canons," while challenging views that assign a decisive role to Athanasius, Marcion, or the Gnostics. Marksches concludes by arguing that the complementary model of the "identity" and "plurality" of early Christianity is better equipped to address the question of unity and diversity than Walter Bauer's cultural Protestant model of "orthodoxy and heresy" or the Jesuit model of the "inculturation" of Christianity."-- Provided by publisher.

In this second volume, Webster progresses the discussion to include topics in moral theology, and the theology of created intellect. An opening chapter sets the scene by considering the relation of christology and moral theology. This is followed by a set of reflections on a range of ethical themes:

the nature of human dignity; mercy; the place of sorrow in Christian existence; the nature of human courage; dying and rising with Christ as a governing motif in the Christian moral life; the presence of sin in human speech. Webster closes with studies of the nature of intellectual life and of the intellectual task of Christian theology.

It has rarely been recognized that the Christian writers of the first millennium pursued an ambitious and exciting philosophical project alongside their engagement in the doctrinal controversies of their age. *The Rise of Christian Theology and the End of Ancient Metaphysics* offers, for the first time, a full analysis of this Patristic philosophy. It shows how it took its distinctive shape in the late fourth century and gives an account of its subsequent development until the time of John of Damascus. The book falls into three main parts. The first starts with an analysis of the philosophical project underlying the teaching of the Cappadocian fathers, Basil of Caesarea, Gregory of Nyssa and Gregory of Nazianzus. This philosophy, arguably the first distinctively Christian theory of being, soon became near-universally shared in Eastern Christianity. Just a few decades after the Cappadocians, all sides in the early Christological controversy took its fundamental tenets for granted. Its application to the Christological problem thus appeared inevitable. Yet it created substantial conceptual problems. Parts two and three describe in detail how these problems led to a series of increasingly radical modifications of the Cappadocian philosophy. In part two, Zachhuber explores the miaphysite opponents of the Council of Chalcedon, while in part three he discusses the defenders of the Council from the early sixth to the eighth century. Through this overview, the book reveals this period as one of remarkable philosophical creativity, fecundity, and innovation.

This volume explores contemporary Christian political theology, discussing its traditional sources, its emergence as a discipline, and its key issues.

"This intellectual history, a story of people and their ideas, is a delight to read. I predict it will be widely used not only in colleges and seminaries but also in lay institutes and study groups".....John D. Godsey in The Christian Century

A modern classic, A History of Christian Theology offers a concise yet complete chronicle of the whole of Christian theology, from its background in the history of Israel to the liberation and postliberal theologies of recent years. This updated thirtieth anniversary includes expanded treatments of theological developments at the end of the twentieth century, and preliminary trajectories for theology in the twenty-first century. It also includes updated bibliographies and revised chapters on important innovations in biblical studies, and their impact on theology. This updated and revised edition will continue to aid the work of both students and faculty for years to come. William C. Placher is to be congratulated for having done what many would have considered impossible. In slightly more than 300 pages he has chronicled the whole history of Christian theology, from its background in the history of Israel to the various modes of liberation theology in the late 20th century. Moreover, he has touched almost all of the important bases and has dealt with significant figures, issues, movements in an incisive and illuminating manner. This intellectual history, a story of people and their ideas, is a delight to read. I predict it will be widely used not only in college and seminaries, but also in lay institutes and study groups. -- John D. Godsey in The Christian Century
