What are super, primary, candidate and foreign keys? Ans: A super key is a set of attributes of a relation schema upon which all attributes of the schema are functionally dependent. No two rows can have the same value of super key attributes. A Candidate key is minimal superkey, i.e., no proper subset of Candidate key attributes can be a superkey. A Primary Key is one of the candidate keys.

Have a question? Send us a question or comment. OR. You may receive your test results directly from your physician. Next time your physician orders a lab test, ask your physician to indicate on the requisition that Quest Diagnostics should also send you a copy of the test results. Most tests take between 1 to 10 days to complete.

Environmental changes have significant impacts on people's lives and livelihoods, particularly the urban poor and those living in informal settlements. In an effort to reduce urban residents' exposure to climate change and hazards such as natural disasters, resettlement programmes are becoming widespread across the Global South. While resettlement may reduce a region's future climate-related disaster risk, it often increases poverty and vulnerability, and can be used as a reason to evict people from areas undergoing redevelopment. A collaboration between the Bartlett Development Planning Unit at UCL, the Indian Institute for Human Settlements and the Latin American Social Science Faculty, Rethinking Urban Risk and Resettlement in the Global South collates the findings from 'Reducing Relocation Risks', a research project that studied urban areas across India, Uganda, Peru, Colombia and Mexico. The findings are augmented with chapters by researchers with many years of insight into resettlement, property rights and evictions, who offer cases from Monserrat, Cambodia, Philippines and elsewhere. The contributors collectively argue that the processes for making and implementing decisions play a large part in determining whether outcomes are socially just, and examine various value systems and strategies adopted by individuals versus authorities. Considering perceptions of risk, the volume offers a unique way to think about economic assessments in the context of resettlement and draws parallels between different country contexts to compare fully urbanised areas with those experiencing urban growth. It also provides an opportunity to re-think how disaster risk management can better address the accumulation of urban risks through urban planning.
This book contains the papers presented at the 5th International Conference on Pr- tical Aspects of Knowledge Management organized by the Department of Knowledge Management, Institute of Computer Science and Business Informatics, University of Vienna. The event took place on December 02–03, 2004 in Vienna. The PAKM conference series offers a communication forum and meeting ground for practitioners and researchers engaged in developing and deploying advanced bu- ness solutions for the management of knowledge and intellectual capital. Contributions pursuing integrated approaches which consider organizational, technological and c- tural issues of knowledge management have been elected for presentation. PAKM is a forum for people to share their views, to exchange ideas, to develop new insights, and to envision completely new kinds of solutions for knowledge management problems. The accepted papers are of high quality and are not too specialized so that the main issues can be understood by someone outside the respective ?eld. This is crucial for an interdisciplinary exchange of ideas. Like its predecessors, PAKM 2004 featured two invited talks. It is a real joy seeing the visibility of the conferenceincrease and noting that kno- edge management researchers and practitioners from all over the world submitted - pers. This year, 163 papers and case studies were submitted, from which 48 were - cepted.
The book is meant for first year BE/B.Tech. students and addresses the course curriculum in Mechanical Experiments and Workshop Practice. The book explains theory and methodology of performing experiments about: " Mechanics " Strength of Materials " Materials Science The book also includes: " IC Engines " Steam Engines " Boilers " Steam Turbines " Water Turbines and Pumps Manufacturing processes and workshop experiments are included in workshop practice which cover: " Machining " Welding " Metal forming " Casting " Carpentry and Plumbing Key Features: " It provides a large number of diagrams for easy understanding of tools and equipment. " A large number of viva and objective type questions are also given.The concepts and principles of working of various common mechanical machinery such as bi-cycle, motorcycle, lift, escalator, hovercraft, aircraft, helicopter, jet engine and rocket have been explained. Similarly the constructional details and principles of working of commonly used household appliances such as desert cooler, air conditioner, refrigerator, washing machine, ceiling fan, tubelight and iron box have been included.

We have seen thousands of promising engg. And oher professional carers being ruined due to lack of basic writing skills in english language.The students cannot be blamed for this short fall of late the trend has been to lay complete emphasis on teaching only subjects related to the technical and other professional stream chosen by the students.
