~~filters and filtration handbook fifth edition~~

Filters are networks that process signals in a frequency-dependent manner. The basic concept of a filter can be explained by examining the frequency dependent nature of the impedance of capacitors and inductors. Consider a voltage divider where the shunt leg is a reactive impedance.

~~CHAPTER 8 ANALOG FILTERS~~

When the warning lamp show above is illuminated, it is important that the actions below (as detailed in the vehicle ' s handbook) are carried out as soon as possible. As soon as the traffic conditions permit, assist the regeneration of the filter by driving at a speed of at least 40 mph until the warning lamp goes off.
