In Green Empire, Kathryn Ziewitz and June Wiaz explain how St. Joe is poised to permanently and drastically alter the landscape, environment, and economic foundation of the Panhandle, the state's last frontier."

From the time the first humans reached the Florida peninsula more than 12,000 years ago through today's complex and diverse state, this timeline narrative sets Florida's fascinating history against the backdrop of world events. Learn how early native peoples, European exploration, wars, and transformative economic, social, cultural, and technological changes have shaped and continue to shape the "Sunshine State."

Award-winning journalist Gerard Colby takes readers behind the scenes of one of America's most powerful and enduring corporations; now with a new introduction by the author Their name is everywhere. America's wealthiest industrial family by far and a vast financial power, the Du Ponts, from their mansions in northern Delaware's "Chateau Country," have long been leaders in the relentless drive to turn the United States into a plutocracy. The Du Pont story in this country began in 1800. Éleuthère Irénée du Pont, official keeper of the gunpowder of corrupt King Louis XVI, fled from revolutionary France to America. Two years later he founded the gunpowder company that called itself "America's armorer"—and that President Wilson's secretary of war called a "species of outlaws" for war profiteering. Du Pont Dynasty introduces many colorful characters, including "General" Henry du Pont, who profited from the Civil War to build the Gunpowder Trust, one of the first corporate monopolies; Alfred I. du Pont, betrayed by his cousins and pushed out of the organization, landing in social exile as the powerful

“Count of Florida”; the three brothers who expanded Du Pont’s control to General Motors, fought autoworkers’ right to unionize, and then launched a family tradition of waging campaigns to destroy FDR’s New Deal regulatory reforms; Governor Pete du Pont, who ran for president and backed Newt Gingrich’s 1994 Republican Revolution; and Irving S. Shapiro, the architect of Du Pont’s ongoing campaign to undermine effective environmental regulation. From plans to force President Roosevelt from office, to munitions sales to warlords and the rising Nazis, to Freon’s damage to the planet’s life-protecting ozone layer, to the manufacture of deadly gases and the covered-up poisoning of Du Pont workers, to the reputation the company earned for being the worst polluter of America’s air and water, the Du Pont reign has been dappled with scandal for centuries. Culled from years of painstaking research and interviews, this fully documented book unfolds like a novel. Laying bare the bitter feuds, power plays, smokescreens, and careless unaccountability that erupted in murder, Colby pulls back the curtain on a dynasty whose formidable influence continues to this day. Suppressed in myriad ways and the subject of the author’s landmark federal lawsuit, Du Pont Dynasty is an essential history of the United States.

Root and Park examine the plight of workers displaced from two paper mills and their paths to reemployment, retirement decisions, and the personal struggles they faced as a result of their dislocations. They provide insightful, personal portraits of workers that are representative of the hundreds who lost their jobs as a result of two mill closings—one in Sartell, Minnesota, and the other in Bucksport, Maine. In addition, the authors describe the types of assistance that were offered to the workers displaced by the mill closings, dedicate a chapter each to the plights of

female workers and of spouses who were both displaced by the closings, discuss the importance of community when economic displacement occurs, compare the experience of a mill closing in Canada with the Maine and Minnesota closings, and conclude with ways that society can be more proactive in assisting workers who suffer job displacement and the economic and psychological impacts that so often occur as a result. Overall, this book adds a human perspective to the problems facing dislocated workers, not only in the shrinking paper industry but also in other contracting industries in the United States.

Over the last century, the Everglades underwent a metaphorical and ecological transition from impenetrable swamp to endangered wetland. At the heart of this transformation lies the Florida sugar industry, which by the 1990s was at the center of the political storm over the multi-billion dollar ecological “restoration” of the Everglades. *Raising Cane in the 'Glades* is the first study to situate the environmental transformation of the Everglades within the economic and historical geography of global sugar production and trade. Using, among other sources, interviews, government and corporate documents, and recently declassified U.S. State Department memoranda, Gail M. Hollander demonstrates that the development of Florida’s sugar region was the outcome of pitched battles reaching the highest political offices in the U.S. and in countries around the world, especially Cuba—which emerges in her narrative as a model, a competitor, and the regional “other” to Florida’s “self.” Spanning the period from the age of empire to the era of globalization, the book shows how the “sugar question”—a label

nineteenth-century economists coined for intense international debates on sugar production and trade—emerges repeatedly in new guises. Hollander uses the sugar question as a thread to stitch together past and present, local and global, in explaining Everglades transformation.

Bringing together a team of national experts, this volume offers a detailed look at the links between public land acquisition programs and efforts to yield smart growth outcomes in the USA. Both public land acquisition programs and state and local growth management efforts have been examined in detail, but while there is growing recognition that land acquisition can play an important role in smart growth outcomes, there has so far been little research into the nexus of these areas of public policy. This book investigates various aspects of the land acquisition-smart growth linkage and describes model programs and makes recommendations for the adoption of land acquisition efforts nationally and internationally. It will appeal to practising planners, policy makers, public officials, and citizen groups, as well as academics of urban planning, environmental studies, geography and other disciplines which examine issues of urban sprawl.
