Wissenschaft der Logik, WdL), first published between 1812 and 1816, is the work in which Georg Wilhelm Friedrich Hegel outlined his vision of logic. Hegel's logic is a system of dialectics, i.e., a dialectical metaphysics: it is a development of the principle that thought and being constitute a single and active unity. ...

VIII: Why do we say that Hegel is an " idealist " ? Hegel described himself as an Idealist, Hegel emphasised the active side rather than passive contemplation, Hegel took the social elite to be the agents of change, Hegel believed that institutions tend to be true to their concept, Hegel minimised the effect of mundane relations on institutions, Hegel overestimated speculative reason relative ...

## ~~Science of Logic – Hegel~~

Logic is the practice not of justifying the ways of God to man but of justifying the ways of thinking to thought itself. It is thus a logic of freedom, not only in the sense that it articulates the logic of what it means to be free, but also in the sense that it is a fully free practice of logic, leaving no presupposition uncontested and ...
