Exam-targeted, 5 solved & 5 Self-Assessment papers with Hints All CBSE-specified typologies of questions Answers follow Board Marking Scheme and word limit Polish concepts with 'Answering Tips' Avoid mistakes with 'Commonly Made Errors' Crisp revision with 'On-Tips Notes' (applicable only for science, maths, social, computer application & selected subjects in class 11) Learn more with 'Mind Maps' Clarify doubts with 'Oswaal Grammar Charts' QR codes for quick revision on mobiles/tablets

Assessment is an important part of effective teaching and learning. It allows achievements to be recognized and helps both teachers and learners to reflect on and review their performance and progress. While assessment has long been an end-of-learning activity to measure what learners can do, the outcome-oriented approach does not always foster learning motivation effectively. A new perspective now encourages ongoing appraisal in the classroom to improve learning. This book reflects current thinking of assessment with a stated focus on assessment for learning (AFL). It informs teachers about the latest developments and provides teachers with important tools for integrating assessment in the classroom. The discussions on assessment theories are in-depth and the examples used for illustrating the concepts are plentiful.

'This volume addresses a very timely and important topic, and provides both broad and in-depth coverage of a number of large-scale English tests in China, including Hong Kong and Taiwan, and about the Chinese learner.' – Lyle F. Bachman, From the Foreword Building on current theoretical and practical frameworks for English language assessment and testing, this book presents a comprehensive, up-to-date, relevant picture of English language assessment for students in China (Mainland China, Hong Kong and Taiwan) and for Chinese learners of English around the world. Written by well-recognized international scholars in language testing, it covers: the history of tests and testing systems, issues and challenges, and current research in China both test-designers' and test-users' points of view on test development and test validation within a range of political, economical, social, and financial contexts in China theoretical/conceptual perspectives on the use of the English language assessment at different levels, including societal, university, and schools empirical research related specifically to test development, curricular innovation, and test validation Given the long history of objective testing and its extensive use in Chinese society, and considering the sheer number of students taking various tests in English in China and elsewhere, an understanding of the impact of English language testing is essential for anyone involved in testing and assessment issues in China and elsewhere in the world. This is a must-read volume for testing and assessment policy makers, curriculum designers, researchers, ESL/EFL materials writers, graduate students, and English language teachers/researchers at all levels.

This book offers insights into the concept that a test can be used to encourage innovation in the classroom.

Originally published in 1911, this book forms one of three volumes of the collected papers of legal historian Frederic William Maitland. The texts cover a broad range of areas, with some philosophical and biographical subject matter, but for the most part they relate to the spheres of legal and social history.

Based on American rather than British English, this is among the first Russian dictionaries revised for the post-Soviet era. Includes new political terminology, new Russian institutions, new countries and republics and new city names. Contains 26,000 entries in the English-Russian section and 40,000 words in the Russian-English section. Irregularities in Russian declensions and conjugations appear at the beginning of each entry.
