Dunbar covers a great deal in this book. It focuses on the challenge of understanding some of the challenging transitions in human evolution - how our primate species developed the mental structures to handle the level of social complexity required for building human society, and how it may have been

Pelican Introductions (16 books) - Goodreads

“There are probably two key aspects of culture that stand out as being uniquely human. One is religion and the other is story-telling. There is no other living species, whether ape or crow, that do either of these. They are entirely and genuinely unique to humans.” — Robin Dunbar, Human Evolution: A Pelican Introduction

form of sociality is much more complex than that of other species (Byrne & Whiten, 1988). This does not mean that they live in larger social groups than ...

---

Social Brain Hypothesis and Human Evolution | Oxford ...

Human evolution, the process by which human beings developed on Earth from now-extinct primates. Viewed zoologically, we humans are *Homo sapiens*, a culture-bearing upright-walking species that lives on the ground and very likely first evolved in Africa about 315,000 years ago. We are now the only living members of what many zoologists refer to as the human tribe, *Hominini*, but there is abundant ...
