Drives with MDD AC servo motors are especially well-suited for use in tool, textile, printing and packaging machines, as well as robotics, handling equipment and transfer facilities. MDD motors assure high contouring accuracies at high feedrates, in particular when used for cutting in high speed ranges.

Liquid-cooled MDD servo motors are protected by their housing and covers as per DIN VDE 0470, section 1 (edition dated 11/92) against:

- contact with live or moving parts
- penetration by objects and water

The protection categories are indicated in terms of the letters IP (International Protection) and two digits for the grade of protection.
