ISO 8501-1 is a visual reference and does not explicitly state percentages. The specifications specifically mention stains, streaks and shadows, but they are practically the same: a residue showing a difference in color but of no discernible thickness. Tightly adhered material refers to anything that cannot be peeled off with a dull putty knife.

Surface Preparation Standards Explained - SSPC/NACE & ISO 8501  
ISO 8501, ISO 8502 and ISO 8503 do not contain recommendations for the protective systems to be applied to the steel surface. Neither do they contain recommendations for the preparation grades for specific situations even though surface quality can have a direct influence on the
