Irvine, and presents a complete and concise examination of introductory macroeconomics theory and policy suitable for a first introductory course. Examples are domestic and international in their subject matter and are of the modern era – financial markets, monetary and fiscal policies aimed at inflation and debt control, globalization and the importance of trade flows in economic structure, and concerns about slow growth and the risk of deflation, are included. This textbook is intended for a one-semester course, and can be used in a two-semester sequence with the companion textbook, Principles of Microeconomics. The three introductory chapters are common to both textbooks."--BCcampus website.

No Problem! offers tips, tricks, and inspiration for winging it in the kitchen. Each chapter offers practical kitchen and cooking advice, from an overview of essential tools and pantry items to keep on hand to how to combine flavors and find good substitute ingredients, whether it's sheet pan chicken, vegetables, pasta, grain bowls, or pizza for tonight's dinner. Freestyle Cooking charts provide a scaffolding for building a finished dish from what cooks have available; Kitchen Cheat Sheets lend guidance on preparing meats, vegetables, and grains with correct cooking times and temperatures; and stories from Good's Cooking Circle offer personal experiences and techniques for successfully improvising for delicious results, such as how to combine flavors that work well together or how to use acid to draw out the sweetness in unripened fruit.
