"This thesis studies the military and political implications for employing fully Lethal Autonomous Weapons Systems (LAWS). It considers three motivating factors for the employment of

# Read Book

## Lethal

LAWS, which are riskless war, expediency, and an American affinity for technological solutions. Historically, since World War I, air power has rested at the intersection of these three factors by providing the most sufficient solution for each motivating factor. As a result,

# Read Book

## Lethal

policymakers have tended to view air power as the "go-to" solution for foreign-policy issues involving the use of force. Due to future operating contexts and operational requirements, however, LAWS will eventually supplant air power as the default solution. As already evidenced by the prevalence of

# Read Book

## Lethal

Unmanned Aerial Vehicles (UAVs), this shift has already started and will likely continue in the future. During such "future-gazing," we can see into the mirror only dimly, realizing that even hindsight does not always provide clarity.<sup>1</sup> However, what is becoming clearer each day is how the United

# Read Book

## Lethal

States chooses to employ LAWS will likely have international implications. This thesis argues that the most pressing challenge for determining how and when to employ LAWS is an issue of prestige. Moreover, prestige has moral and functional components, many of which heavily depend upon perceptions. Thus,

# Read Book

## Lethal

while the United States does not want to cede a technological advantage in the area of LAWS, it must consider the alternative perceptions this may create, and tailor policy and strategy accordingly."--Abstract.
