In 1812, Sir John Malcolm, a Lieutenant General in the British Army wrote A Sketch of the Sikhs , commonly believed to be the first account of the Sikhs written by a non-Sikh. In truth, soldiers, travellers, diplomats, missionaries and scholars had provided accounts for many years before. Drawing on this difficult-to-access material, the editors of this volume have compiled a unique source that offers a fascinating insight into the early developments in Sikh history. From the first ever written accounts of the Sikhs by Persian chroniclers of the Moghul Emperor to the travel diary of an Englishwoman, this volume contains material invaluable to those studying the evolution of the Sikh religion as well as to those interested in learning more about this major religion. It also provides an unparalleled look into the growth and solidification of the religious practices of Sikhs. At a time when the misunderstanding of the Sikh religion and those who practise it has reached new and deadly heights, this volume hopes to introduce a wider audience to the roots of its culture. For more detailed information, including examples of illustrations, and selected extracts, go to www.sicques.com

Plant improvement has shifted its focus from yield, quality and disease resistance to factors that will enhance commercial export, such as early maturity, shelf life and better processing quality. Conventional plant breeding methods aiming at the improvement of a self-pollinating crop, such as wheat, usually take 10-12 years to develop and release of the new variety. During the past 10 years, significant advances have been made and accelerated methods have been developed for precision breeding and early release of crop varieties. This edited volume summarizes concepts dealing with germplasm enhancement and development of improved varieties based on innovative methodologies that include doubled haploidy, marker assisted selection, marker assisted background selection, genetic mapping, genomic selection, high-throughput genotyping, high-throughput phenotyping, mutation breeding, reverse breeding, transgenic breeding, shuttle breeding, speed breeding, low cost high-throughput field phenotyping, etc. It is an important reference with special focus on accelerated development of improved crop varieties.

This edited book presents a novel collection of field-based empirical studies on the Quaternary geomorphology of the Lower Ganga Basin. The book covers a wide range of topics discussing various geomorphological facets of the Lower Ganga and its subsidiary rivers focussing on laterites, palaeoenvironment and palaeogeomorphology, palaeo-coastal landforms, neo-tectonism, tidal-fluvial dynamics, extra-channel geomorphology and channel-pattern adjustment among others. Various methodologies were applied ranging from historical records and religious texts to state-of-the-art remote sensing and GIS techniques. The book appeals to all scientists and post-graduate students of geomorphology and related areas who want to acquire detailed knowledge of the geology and geomorphology of the Lower Ganga Basin or are in search of new methodologies for studying the feedback mechanisms between forms and processes.

A comprehensive horoscope for 2021 covers monthly and yearly predictions These horoscopes not only cover all key aspects of your life viz health, family, career, finances, education but also provide guidance and practical wisdom to lead you towards inner peace and happiness These editions are borne out of a deep study and have been meticulously prepared by renowned spiritual leader and astrologer - Acharya Rajan, who represents a new generation of truly global individuals emerging out of the East & the West who firmly believe in Astrology as a Science and Celestial powers equitable to cosmic movements with second-by-second mathematical calculations While the qualification in Engineering bestowed an illustrious corporate life, Acharya Rajan now endeavors to nurture in every person, every being for how you want to respond to what life brings you.
