This monograph is the first large-scale corpus analysis of French il y a clefts. While most research on clefts focusses on the English ‘ prototypical ’ it-cleft and its equivalents across languages, this

study examines the lesser-known il y a clefts – of both presentational-eventive and specificational type – and provides an in-depth analysis of their syntactic, semantic and discourse-functional properties. In addition to an extensive literature review and a comparison with Italian c'è clefts and with
