a) $x^2 - 13x + 40 = 0$: Here, Product = Coefficient of $x^2 \times$ constant = $1 \times 40 = 40$. Add = $(-1) \times$ Coefficient of $x = (-1) \times (-13) = 13$. If the product is positive, the sign of the roots will be same and it will depend upon the sign of the Add. So in this case, the sign of the roots will be positive. Hence, $x = 8, 5$.

Calculus-1: Course in Mathematics for the IIT-JEE and Other Engineering Entrance Examinations is designed to help students master calculus for the coveted IIT-JEE, AIEEE, state-level engineering entrance exams and all other state senior secondary exams, in addition to the AISSSCE. The book adopts a well-defined, meticulously planned and smartly structured learning approach. It includes lecture-wise tests that help revise each completed lecture. It contains Speed Accuracy Sheets that improve the speed and accuracy of students and help them revise key concepts. It also provides innovative tips and tricks that are easy to apply and remember and includes solved Topic-Wise Question Banks to enhance the comprehension and application of concepts. This first volume deals with Functions, limits, continuity, differentiability and applications of derivatives.

Engineering Mathematics with Examples and Applications provides a compact and concise primer in the field, starting with the foundations, and then gradually developing to the advanced level of mathematics that is necessary for all engineering disciplines. Therefore, this book's aim is to help undergraduates rapidly develop the fundamental knowledge of engineering mathematics. The book can also be used by graduates to review and refresh their mathematical skills. Step-by-step worked examples will help the students gain more insights and build sufficient confidence in engineering mathematics and problem-solving. The main approach and style of this book is informal, theorem-free, and practical. By using an informal and theorem-free approach, all fundamental mathematics topics required for engineering are covered, and readers can gain such basic knowledge of all important topics without worrying about rigorous (often boring) proofs. Certain rigorous proof and derivatives are presented in an informal way by direct, straightforward mathematical operations and calculations, giving students the same level of fundamental knowledge without any tedious steps. In addition, this practical approach provides over 100 worked examples so that students can see how each step of mathematical problems can be derived without any gap or jump in steps. Thus, readers can build their understanding and mathematical confidence gradually and in a step-by-step manner. Covers fundamental engineering topics that are presented at the right level, without worry of rigorous proofs Includes step-by-step worked examples (of which 100+ feature in the work) Provides an emphasis on numerical methods, such as root-finding algorithms, numerical integration, and numerical methods of differential equations Balances theory and practice to aid in practical problem-solving in various contexts and applications

This book is aimed to provide short tricks and keys to be useful for medical and engineering entrance exams. All possible efforts have been made to overcome the difficulties that student generally face during exams to solve chemistry questions.This book also contains many keys to remember concepts easily. It is very useful for students who are preparing for competitive exams like NEET/JEE/AIIMS,

JEE (Main and Advanced) is one of the toughest examinations in the country in terms of the number of aspirants, the difficulty of the questions and the selection ratio. A student who prepares for JEE faces a tremendous amount of pressure and goes through tight schedules because he/she has to prepare for both Board Exams and JEE simultaneously. Also, infinite numbers of paid/free books, videos and other resources are readily available on both offline and online platforms these days. They usually put the student in a confused state. With many roadblocks and constraints ahead in the journey, a serious aspirant must know how to optimize his/her preparation and performance in the exams. In this book, we share insights and lessons from the experience we have gained over the past several years as successful JEE aspirants ourselves initially, then as IITians who got an opportunity to learn and interact with hundreds of other JEE toppers during our college days at IIT Madras and finally, as JEE Gurus, having successfully trained and guided hundreds of aspirants in the past. This is a must-read book for all students (and their parents alike) who are in high school (and above) and are dreaming to crack JEE (and similar exams) one day.
