Once we have the yield curve, we can easily use it to derive the forward rates (see Piazzesi and Schneider, 2009). The forward rate contracted at time  $t$  for loans from time  $t + h$  to time  $t + h + \tau$  can be expressed as a linear function of yields with maturities  $\tau + h$  and  $h$  :

$$f_{t+h}(\tau) =$$
