Reveals a sensible way to rebuild public education and close the achievement gap for all students. Indeed, this is already happening in a most unlikely place: Union City, New Jersey, a poor, crowded Latino community just across the Hudson from Manhattan. Kirp explores the game-changing reasons behind Union City's successful schools, including quality early education, a word-soaked curriculum, and hands-on help for teachers. Improbable scholars offers a playbook for reform that will dramatically change our approach to reviving public education-

Welcome back to Cedar Cove! Visit with the characters you know and love, discover new ones, and learn what new mystery is keeping the charming town—and Judge Olivia Lockhart—busy! Only in this beloved series by #1 New York Times bestselling author Debbie Macomber. In a small town where everyone is friendly, it ' s unusual to have a mystery. But private investigator Roy McAfee and his wife, Corrie, have been receiving anonymous postcards with cryptic messages, and no one can figure out what they mean. It feels as though someone from their past might be trying to shake things up. Their daughter, Linnette, has moved to Cedar Cove to work at the new medical clinic. When her mother buys her a date at the humane society ' s fundraiser auction, she is less than enthusiastic about it. But maybe she ' s one more step closer to finding the true love she ' s been seeking. Previously published

Must forbidden love end in heartbreak? Kayla Sinclair knows she ' s in big trouble when she almost bankrupts herself to buy a life-size portrait of a mysterious eighteenth century man at an auction. Jago Kerswell, innkeeper and smuggler, knows there is danger in those stolen moments with Lady Eliza Marcombe, but he ' ll take any risk to be with her. Over two centuries separate Kayla and Jago, but, when Kayla ' s jealous fiancé presents her with an ultimatum, and Jago and Eliza ' s affair is tragically discovered, their lives become inextricably linked thanks to a gypsy ' s spell. Kayla finds herself on a quest that could heal the past, but what she cannot foresee is the danger in her own future. Will Kayla find heartache or happiness? Christina Courtenay won the 2012 Historical Romantic Novel Award for her book Highland Storms.

Old secrets die hard in the tavistock family... In Their Footsteps The quiet scandal surrounding her parents' deaths twenty years ago has always haunted Beryl Tavistock. Now she's decided that the only way to exorcise the ghosts of the past is to search for the truth. Beryl starts asking dangerous questions, and the answers are proving that old secrets die hard. Caught in what's become a deadly game of cat-and-mouse, her quest takes her from the rain-slick streets of Paris to the sun-drenched isles of Greece. And as she gets pulled into a world of espionage, Beryl quickly discovers that she needs help. Richard Wolf, an ex-CIA agent and a man she's only just met, is her only hope. But in a world where trust is a double-edged sword, friends become enemies, and enemies become killers... Stolen Reformed cat burglar Clea Rice has witnessed enough crimes to put her on the straight and narrow. But little does she suspect that her search for justice will land her in the arms of wealthy English gentleman Jordan Tavistock. As their attraction grows, so does the danger. Now their biggest concern isn't whether a proper gentleman and a cat burglar can find happiness...it's whether they'll survive long enough to find out.

The story of Monroe, Zachary, and Angel continues...The Devil's Playground series can be read out of order, but you should read Zachary and Monroe's book before this one.Zachery: Former Marine, swat commander, and hero with a hidden erotic edge. Zachary loves Angel and must also come to terms with his desire for the man he owes everything to or he could lose them both. Zach's background in the world of law enforcement leaves little flexibility when it comes to the strictures of acceptable love.Monroe: Lethal killer and mysterious Shibari artist in love with two special people. He must face his deadly past to keep the people he loves safe. Leaving Angel behind is hard but with so much left unsaid, leaving Zachary is nearly impossible. Monroe's forbidden goodbye could change their shaky dynamic forever.Angel: Rescued after being tortured by white slavers. Her haunted eyes beg two men for love.When tragedy strikes, Zachary and Angel must face a world they never saw coming and discover the strength in a bond more resilient than the strongest rope.Can Angel pull the people she loves into her web of safety?This book is intended for mature audiences. The wireless medium is a shared resource. If nearby devices transmit at the same time, their signals interfere, resulting in a collision. In traditional networks, collisions cause the loss of the transmitted information. For this reason, wireless networks have been designed with the assumption that interference is intrinsically harmful and must be avoided. This book, a revised version of the author's award-winning Ph.D. dissertation, takes an alternate approach: Instead of viewing interference as an inherently counterproductive phenomenon that should to be avoided, we design practical systems that transform interference into a harmless, and even a beneficial phenomenon. To achieve this goal, we consider how wireless signals interact when they interfere, and use this understanding in our system designs. Specifically, when interference occurs, the signals get mixed on the wireless medium. By understanding the parameters of this mixing, we can invert the mixing and decode the interfered packets; thus, making interference harmless. Furthermore, we can control this mixing process to create strategic interference that allow decodability at a particular receiver of interest, but prevent decodability at unintended receivers and adversaries. Hence, we can transform interference into a beneficial phenomenon that provides security. Building on this approach, we make four main contributions: We present the first WiFi receiver that can successfully reconstruct the transmitted information in the presence of packet collisions. Next, we introduce a WiFi receiver design that can decode in the presence of high-power cross-technology interference from devices like baby monitors, cordless phones, microwave ovens, or even unknown technologies. We then show how we can harness interference to improve security. In particular, we develop the first system that secures an insecure medical implant without any modification to the implant itself. Finally, we present a solution that establishes secure connections between any two WiFi devices, without having users enter passwords or use pre-shared secret keys.
