and small secondary schools, including those specializing in technology and those with higher numbers of pupils with special needs, to look at the results of all the political initiatives and investment in ICT. The authors found that the ambitious expectations fell short of reality. Their research into the reasons for this shortfall can help teachers understand and develop ways to make the best use of computers in their schools. It is equally informative for educational researchers and policy-makers.

An essential resource for teachers in inclusive classrooms This valuable sourcebook offers teachers key strategies on how to design and deliver effective instruction, measure success, and get students to work together. Covering topics such as decoding, vocabulary, blocking, using graphic organizers, mnemonics, literary elements, writing as a process, and doing research, it features dozens of ready-to-use language arts activities that are tied to core curriculum standards, and each activity has adaptations for students with different learning needs.

Proposes to show how children can be prepared to develop their full potential as 'thinking' human beings. The activities or 'games' described provide a general foundation which should help the child to deal successfully with specific academic subjects. With Additional Thoughts.

First published in 1987. Routledge is an imprint of Taylor & Francis, an informa company.

Creating the Coding Generation in Primary Schools sets out the what, why and how of coding. Written by industry innovators and experts, it shows how you can bring the world of coding to your primary school practice. It is packed with a range of inspirational ideas for the cross-curricular teaching of coding, from demystifying algebra in maths, to teaching music, to designing digital storytelling, as well as an insight into the global movement of free coding clubs for young people such as CoderDojo and Girls Learning Code. Key topics explored include: what we mean by 'coding' understanding and teaching computational thinking building pupils' passion for and confidence with technologies artificial intelligence systems how gender impacts on coding STEM learning and Computer Science using Minecraft to improve pupil engagement fun projects using a Raspberry Pi. Designed to be read from cover to cover or dipped into for ideas and advice, Creating the Coding Generation in Primary Schools offers all teachers a deeper knowledge and understanding of coding that will help them support and inspire the coding generation. It is cool to code!
