This book's structure reflects the different dimensions to learning science. The first section focuses on the importance of talk in the science classroom, while the second explores the key role of practical work. The third section is concerned with the creative, theoretical aspect of science. Section four follows this by considering the communication of ideas and how pupils learn to participate in the discourse of the scientific community. Section five emphasizes the place of science in the broader context, considering its moral and ethical dimensions and its place in a cultural context. Finally, section six explores the complexity of the task faced by science teachers, highlighting the knowledge and skills science teachers must acquire in order to create an environment in which students are motivated to learn science.

Based on real-life stories from an international school in Kuwait, which chart the survival of teachers from the thrown-in-at-the-deep-end start to the I-can't-believe-we-made-it finish. Outlandish comedy abounds as the teachers laugh and lose it, through a mine field of barriers to logic, and challenges to plain common sense. The book illuminates the startling excesses of the oil-money rich as they balance a past of poverty with an extreme pot of gold from the end of the rainbow. It shows Kuwait as a microcosm reflecting the more global issues surrounding waste, ecology, using more than we need, and consumerism gone mad. The stories reveal the pros and cons of teaching on the international circuit and how the teachers adapt to an alien land of dust, sexual and racial inequality and an oppressive political regime, both inside and outside school. Resilience, fortitude and a hefty dose of humour gets the teachers through to the end with a cheer and a wave.

SGN. The book APS-Army Public School PGT Computer Science Exam covers all sections of the exam.

The focus of this Handbook is on Australasia (a region loosely recognized as that which includes Australia and New Zealand plus nearby Pacific nations such as Papua New Guinea, Solomon Islands, Fiji, Tonga, Vanuatu, and the Samoan islands) science education and the scholarship that most closely supports this program.

The word 'revision' can strike fear into the heart of teachers and students alike! The exam cycle in today's modern education system can feel relentless, resulting in students suffering from information overload and exam fatigue. But it doesn't have to be like this! John Mitchell strongly believes that revision can be a opportunity to deepen students' understanding of a topic in an innovative, collaborative, and fun way - you just need to think outside the box! In this brilliant book, John Mitchell offers a diverse range of activities, games, tips and tricks that teachers can use in the classroom to help guide students through this stressful period. By combing theory with strategies tried and tested in the classroom, it will help teachers to create a culture where students are encouraged to review and reinforce their learning. This consistent approach means that revision becomes an everyday process rather than one that is just used in the run up to exams. From adaptations of well-known games, such as Connect Four and Runaround, to brand new activities, there are ideas that are suitable for very learning style and subject. 100 Ideas for Secondary Teachers: Revision will help you to prepare students for exams effectively, alleviate stress, and reintroduce fun into your revision sessions.
