Low voltage cables. Low Voltage power cables are constructed with rigid, solid or stranded, copper and aluminium conductors, and flexible (bare or tin-plated) copper conductors. XLPE, PVC, LSF/LSOH and elastomer compounds are the main insulating and shielding compounds for these cable types. Steel (or aluminium for single core cables) wires or tapes may

Power Cable Technology provides a precise understanding of the design, manufacture, installation, and testing of a range of electric power cables—from low-voltage, 1,000/1,100V cables to extra-high-voltage, 400kV cables—with reference to future trends in the industry. The authors' mantra is: know your cable. Thus, the book begins with a comprehensive overview of power cable design and manufacturing through the ages, and then: Describes the characteristics of the materials currently used in the production of various power cables Explains how to
