This book deals with the problems in translating literary prose and reveals some pertinent solutions and also concentrates on the need to expand the perimeters of Translation Studies. The translation courses offered at many universities in Bangladesh and overseas treat the subject mostly as an outcome of Applied Linguistics. Presently, the teachers and students of translation are confused at the mounting impenetrability of the books and articles that flood the market. Unfortunately, the translators lay more emphasis on the translation of poetry; there should be more research regarding the particular problems of translating literary prose. One explanation of this could be the fact that the status of poetry is considered higher, but it is more possibly due to the notable flawed

notion that the novels, essays, fiction etc. possess simple structures compared to that of a poem and is thus easier to translate. However, many debates have been organised over when to translate, when to apply the close local equivalent, when to invent a new word by translating clearly, and when to copy.

Simultaneously, the "untranslatable" cultural-bound words and phrases have been continuously fascinating the prose-translators and translation theorists. The plea made in this book is to admit the fact that there is a lot to be learnt from shaping the criteria for undertaking a prose-translation and we should appreciate the hard work, difficulties, or frustration of the 'translators' (go-betweens) in the creation of good sense of the texts.

Children's literature delights in made-up words, nonsensical terms, and creative nicknames, but how do you translate these expressions into another language?
 This book provides a new approach to translation studies to address the challenges of translating children's literature. It focuses on expressive language (nonsense, names, idioms, allusions, puns, and dialects) and provides guidance for translators about how to translate such linguistic features without making assumptions about the reader's capabilities and without drastically changing the work. The text features effective strategies for both experienced translators and those who are new to the field, including exercises and discussion questions that are particularly beneficial for students

training to be translators. This learner-friendly book also offers original contributions to translation theory in light of the translation issues particular to children's literature.

Damascius was head of the Neoplatonist academy in Athens when the Emperor Justinian shut its doors forever in 529. His work, *Problems and Solutions Concerning First Principles*, is the last surviving independent philosophical treatise from the Late Academy. Its survey of Neoplatonist metaphysics, discussion of transcendence, and compendium of late antique theologies, make it unique among all extant works of late antique philosophy. It has never before been translated into English. The *Problems and Solutions* exhibits a thoroughgoing critique of Proclean

metaphysics, starting with the principle that all that exists proceeds from a single cause, proceeding to critique the Proclean triadic view of procession and reversion, and severely undermining the status of intellectual reversion in establishing being as the intelligible object.

Damascius investigates the internal contradictions lurking within the theory of descent as a whole, showing that similarity of cause and effect is vitiated in the case of processions where one order (e.g. intellect) gives rise to an entirely different order (e.g. soul).

Neoplatonism as a speculative metaphysics posits the One as the exotic or extopic explanans for plurality, conceived as immediate, present to hand, and therefore requiring explanation. Damascius

shifts the perspective of his metaphysics: he struggles to create a metaphysical discourse that accommodates, insofar as language is sufficient, the ultimate principle of reality. After all, how coherent is a metaphysical system that bases itself on the Ineffable as a first principle? Instead of creating an objective ontology, Damascius writes ever mindful of the limitations of dialectic, and of the pitfalls and snares inherent in the very structure of metaphysical discourse.

Many “ translation solutions ” (often called “ procedures, ” “ techniques, ” or “ strategies ”) have been proposed over the past 50 years or so in French, Chinese, Russian, Ukrainian, English, Spanish, German, Japanese, Italian, Czech, and

Slovak. This book analyzes, criticizes and compares them, proposing a new list of solutions that can be used in training translators to work between many languages. The book also traces out an entirely new history of contemporary translation studies, showing for example how the Russian tradition was adapted in China, how the impact of transformational linguistics was resisted, and how scholarship has developed an intercultural metalanguage over and above the concerns of specific national languages. The book reveals the intensely political nature of translation theory, even in its most apparently technical aspects. The lists were used to advance the agendas of not just linguistic nationalisms but also state regimes – this is a history in which Hitler, Stalin, and Mao all

played roles, Communist propaganda and imperialist evangelism were both legitimized, Ukrainian advances in translation theory were forcefully silenced in the 1930s, the Cold War both stimulated the application of transformational grammar and blocked news of Russian translation theory, French translation theory was conscripted into the agenda of Japanese exceptionalism, and much else.
